Repository of Useful Scales

Under construction. Please pardon our in-progress look, and check back later again for an updated list of useful scales.

Here you will find a list of scales and measures that could be useful in measuring outcomes in RCCs and studies. Below, the items have been grouped by the constructs they measure. You can open a PDF containing the full items and scoring of each measure by clicking on the link in the "Items" column.

Note: This list is still a work in progress, so any blank spaces currently in the tables will be filled in at a later time. We will also be adding more scales and measures over time.

Recovery Specific Constructs
