Overview of Presentation Types

Symposium Presentation (1 hour): These are formal, thematic presentations. These presentations include three to four symposium presenters, one of whom will be the introductant/discussant. Each presenter will have 15 minutes, with roughly 15 minutes at the end for discussion. The discussion is intended to be interactive with audience participation strongly encouraged.

Roundtable (1-hour session): These should include up to five participants, including a moderator, who will have an opportunity to engage in an interactive discussion about a specific topic. The components of roundtables are: (1) brief overview of the topic to be discussed, (2) nature and orchestration of the interactive discussion.

Poster Presentation: These presentations provide an opportunity for groups or individuals to display their program descriptions and research findings in a poster format. A virtual poster board area will be available for each poster. Each poster presentation will consist of a 3-minute pre-recorded voice over as well as a virtual area for Q & A.
